

2M

			homocysteine and cysteine interconversion
			adenosine nucl. degr.
			L-iso leucine synth.
			L-valine synth.
			inosine 5'-phosphate degr.
			guanosine nucl. degr.
			adenine and adenosine salvage
			heterolactic fermentation
			tunicamycin synth.
			glycolysis
			guanine and guanosine salvage
			peptidoglycan synth.
			mixed acid fermentation
			L-glutamine synth.
			pyrimidine dNMPs de novo synth.
			pyrimidine ribonucleosides salvage
			dodecenoate synth.
			8-amino-7-oxononanoate synth.
			gondoate synth.
			mycolate synth.
			oleate synth.
			streptorubin B synth.
			fatty acid synth. init.
			fatty acid elongation -- saturated
			stearate synth.
			palmitate synth.
			palmitoleate synth. -dodec-5-enoate)
			cis-vaccenate synth.
			fatty acid synth.
			petroselinate synth.
			iso-branched-chain fatty acid synth.
			anteiso-branched-chain fatty acid synth.
			pyrimidine dNMPs synth. from CTP
			L-arabinose degr.
			D-galactose degr.
			L-histidine synth.
			2-oxoglutarate decarboxylation to succinyl-CoA
			UTP and CTP dephos.
